SINGER'S

NOISELESS NEW FAMILY

SEWING MACHINE !

The novelty is that all unnecessary complication is dispensed with, and a very **RAPID PERFECT** and **NOISELESS** operation is secured by the **UTMOST SIMPLICITY OF CONSTRUCTION**.

HOW IT DOES AWAY WITH EXTRA MACHINERY.

By embracing principles that require the *least machinery possible*.

By not attempting in its operation kinds of work that are impractical, and seldom if ever used in a family.

By having but one **Stitch**, which is the best and only practical one made by Sewing Machines, being the **Lock-Stitch**, alike on both sides (*other Stitches are a useless and hurtful addition of complicated machinery*).

By having but one **Hemmer**, which turns *any width of hem*, also *fells perfectly*, thereby avoiding the use of several extra attachments.

By having a remarkably simple **Shuttle**, with few parts.

BEING THUS EASILY UNDERSTOOD,

IT CAN BE OPERATED BY A CHILD.

IT WILL

HEM,
FELL,
BRAID,
CORD,
TUCK,
RUFFLE,
QUILT,
GATHER
AND
EMBROIDER

In the most beautiful and simple manner, and will sew from the coarsest to the finest of materials
WITHOUT CHANGE OF TENSION.

SUPERIOR ALBANY PALE, BROWN, AMBER

ALES,

XX AND PORTER.

Analytical Laboratory,

ALBANY MEDICAL COLLEGE, May 2d, 1859.

I have made careful chemical examinations of several samples from different brewings of the article known as "McKnight's Malt Wine," and find it to be, as represented, a liquid containing nothing but the fermented extract of malt and hops. The different specimens were found to be nearly uniform in composition—the slight difference observed being principally in the amount of alcohol present, owing probably to the varying length of time that had elapsed since the brewings were made.

The Malt Wine examined contained no excess of saccharine matters, such as sugar or honey (as is often the case with similar articles), and which have the effect to mask, to a more or less considerable extent, the peculiar flavor of the hop, and at the same time to diminish the medicinal value of the malt liquors in which they are found. The amount of alcohol contained in the "Malt Wine" is considerably greater than is generally found in American Ales. From the examinations I have made, I am satisfied that the "Malt Wine" is made from carefully selected barley and hops, and is skillfully brewed; that in point of purity, and all desirable qualities, it is fully equal to the best imported ales. As such I can confidently recommend it to the public as an agreeable beverage, and to Physicians as a desirable article for medicinal use.

Buerk's Watchman's Time Detector.

The above engraving is a view of a Time Detector, which is carried about by the watchman to all the different stations to be guarded. At each station is a small key, securely fastened to prevent his taking it with him. The watchman goes from station to station, takes the key fastened there, inserts it into the clock, gives it one turn, and goes on to the next, or to any other station, for he is not bound to go in regular order. By this it follows that a perfect record will be kept of each operation.

The broken-out portion of the watch shows the mechanism which operates the pin which pricks the paper. At A, there is a number of sliding bars which connect with the pricking points, so that, by turning round the key, the ward on it strikes a certain bar and penetrates the dial-paper B. By that act, a small hole is made in the paper, which tells what time the man appeared at each station; how often he came there; how long he stopped; how long it took him to go from one to another; whether he went in regular order or not; in short, it gives a complete record of his night's work.

BUERK'S

Watchman's Time Detector.

This WATCH-CLOCK was introduced to the public in almost every section of the United States and Canadas, several years ago; and it has proved itself to be the best invention in the world for testing the faithfulness of Watchmen. Since its introduction, the Proprietor has improved on some parts, and corrected deficiencies which have been suggested by using it; and he has now a perfect check upon the Watchman. With other clocks, a regular routine has to be followed, but with this a Watchman can be ordered to visit any particular place as often as required, without being compelled to go to places where it is not necessary to visit as often.

The instrument is complete in itself, portable, and as reliable as the best lever watch.

It is not so likely to become disarranged in its works as a good watch, because its parts are stronger. But when it needs cleaning, any common watchmaker can adjust it, its mechanism being simple.

It requires no fixtures or wires communicating from room to room, as is the case with the ordinary Watch-Clocks; a small, inexpensive, stationary key is alone required at each station.

Its use is not restricted to a single building, and places can be guarded that it would be impossible to guard with any other instrument, such as Railroad Tunnels, Bridges, Yards, Shops, &c.

It is very essential to carry the clock secure, taking care that it is not brought in contact with any hard substance, and thereby broken. I have on hand pouches with straps to go over the shoulder and around the body, which I will send with the clock, if ordered. Price, \$2.50.

The instrument will in all cases be warranted perfect and satisfactory.

Its price is invariably **Seventy-Five Dollars**, Cash on Delivery, including as many Keys as are requisite, not exceeding twelve.

THIS WATCH-CLOCK IS SOLD AT A LESS PRICE THAN ANY OTHER IN THE MARKET.

The DETECTOR is used extensively by large Manufacturing Establishments and Railroad Companies in the United States, from whom numerous testimonials have been received.

N.B. Parties purchasing these Clocks should test them sufficiently in the counting room or office, as they will not be taken back after having been injured by the Watchman through carelessness.

 This Detector is covered by two U. S. Patents. Parties using or selling these instruments without authority from me will be dealt with according to law.

All Communications promptly attended to.

The undersigned having taken the Exclusive Sale of these

CELEBRATED STOVES,

would respectfully invite the public to call and examine the same, which for neatness of design, beauty of finish, economy in the use of fuel, and ease and convenience in its general arrangements, surpasses anything in the Stove line which has hitherto been introduced to the public. A careful examination of this Stove will convince any one at all acquainted with the management of a Cook Stove that it has no rival in point of utility and capacity to do a large amount of work with a small amount of fuel. It is, in fact, just what the people have long been craving for, and the manufacturers believe that the ultimatum of a convenient and economical cook has been reached in the production of this Stove, and its many excellent features must commend it to the careful attention and patronage of intelligent housekeepers.
